

COMPANY PROFILE  
**AVC ENGINEERING**

AVC Engineering was formed in 2002 after the completion of Phuket FantaSea where AVC's directors were responsible for automation, illusions, and stage management.

Initially, we focused on home automation based on our theatrical and theme park experience. As our client base grew we were increasingly asked to solve a wider range of problems, extending our expertise to include lighting, mechanical, electrical and plumbing design and engineering.

In 2005, following the tsunami, AVC collected donations from customers, Laguna and Trisara, and built over 70 houses in six months for families that were displaced, receiving a royal award.

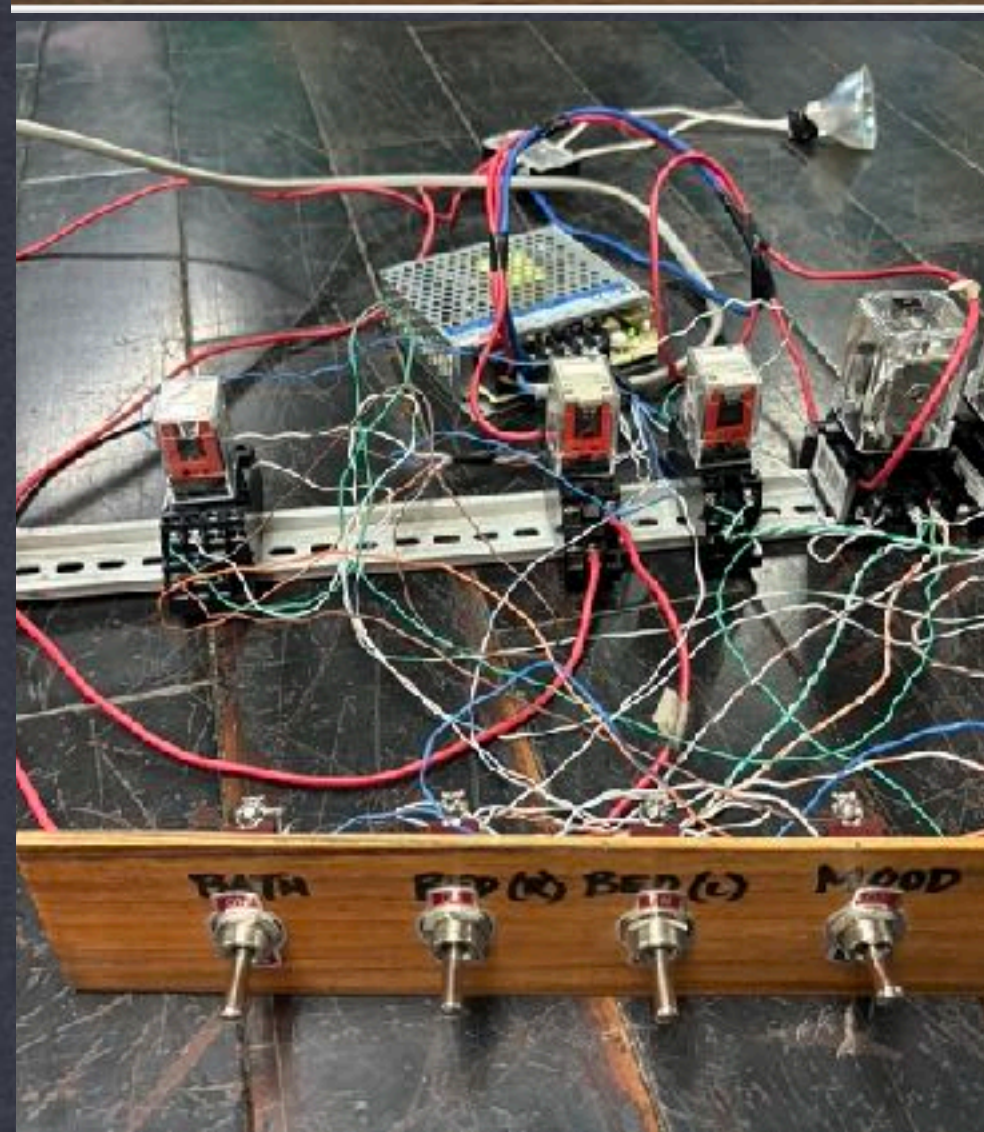

In 2008 AVC built a new office to accommodate the increasing number of staff and projects. AVC also branched out to Bangkok and Samui for interesting projects.

After more than 20 years of serving Phuket, AVC has earned a reputation for working on high-end projects from the very beginning, through to the end. Each project is unique, and we go out of our way to integrate our designs into challenging architecture and interior design, as well as challenging site conditions.

Please see a selection of our past and current projects:

PROJECT

# ANANTARA GOLDEN TRIANGLE TREEHOUSE

MEP ENGINEERING & LIGHTING DESIGN

DATE

2024

LOCATION

MAE SAI, CHIANG RAI

PROJECT

# VISIT PANWA MARINA
